- Address the feasibility of the project (i.e., is the project reasonable for you to pursue with the available facilities?)
- Answer the question: Is the proposed research/ scholarly activity of value to your field of study? How? and Why?
- Answer the question: Is the project of sufficient difficulty to challenge you?
- Answer the question: Will the project teach you skills that are transferable to other research endeavors/scholarly activities?

Address other criteria you deem appropriate

#### Remember!

You must cite every source you reference in your proposal (including data, figures and language)! Not appropriately citing your sources will doom your proposal. Use the style guidelines preferred by your specific discipline.

### Writing the Research Proposal (Item 7)

- Your 5-page research proposal is separate from your 1-page research summary
- Your works cited section does not count against the 5-page limit for the research proposal
- Discussion of background should account for no more than 25% of the project description
- When introducing your topic, assume you are writing to a generalist in your field
- The timeline should be bolded, and should outline clear incremental goals for the project's funding period

- What is one thing successful proposals have in common?
- Successful applicants typically cite at least **five** sources in their research proposals.
- How can you ensure you have high quality, credible sources?

#### Where do you start?

- Start by building a relationship with both your faculty mentor and librarian; they are your research team.
- Schedule a consultation with a research librarian early in the process.

- Discuss meet with your faculty mentor
- Refine meet with your librarian
- Research in depth consultation with librarian

- Working with a research service librarian can be:
